Standard Furnaces & Ovens 

More than 300 models from 200 to 2000°C,
capacity from 1 to 8000 liters

Laboratory ovens <500°C

Laboratory ovens with natural or forced convection

Industrial ovens <500°C

Industrial ovens with natural or forced convection

High temperature furnaces >1300°C

High temperature furnaces up to 1800°C

Melting furnaces

Fixed, removable or tilting crucible furnaces for melting non-ferrous metals

Laboratory furnaces <1100°C

Laboratory chamber furnaces

Industrial furnaces 500–1300°C

Industrial chamber furnaces

Heat treatment furnaces

Furnaces for work under controlled atmosphere

Components & spare parts

Muffles, crucibles, regulators, gloves, apron, high temperature mittens, head protection, hide sleeves

Glass

Watches

Gold, silver

Dental

Melting

Ashing

Lab

Pottery

History

Borel since 1918

Dr. Charles Borel

Borel was founded in 1918 by Dr. Charles Borel. It is one of the oldest furnace manufacturers in Europe. Borel ovens are used by more than 20'000 customers worldwide.

Presentation

Borel Swiss is the leading manufacturer of electric furnaces, kilns and ovens for metal, heat processing, heat treating, metal melting, ceramics, glass, porcelain, pottery markets.

Borel offers a whole range of standard furnaces, accessories & spare parts.

Borel Swiss is certified ISO 9001 & ISO 14001 by SGS Switzerland and proposes, upon request and under advantageous conditions, guarantee extensions up to 5 years for all its products. All the Borel furnaces are EC certified and some of them may be subject to special certifications (AMS type) upon request.

All the Borel furnaces are made in Switzerland or in Europe by our subcontractors with whom we have a partnership. All the Borel furnaces are subject to a quality control and functioning tests in our workshops in Switzerland before shipment.

Borel Swiss is a division of SOLO Swiss Group – www.soloswiss.com
